

Sustainable Initiatives

Coriander Designs acknowledges our obligation to maintain and nurture the ecology of our planet. We are fully aware that humankind has a responsibility to respect and preserve the delicate balance of nature.

We are constantly striving to add to our sustainable efforts in our materials selection, our manufacturing processes, and our facility. We understand there is more work to be done but we are committed to putting in the time for those efforts we can realistically achieve.

We are a FSC® certified shop

We offer FSC-certified wood products, when specified by our customers. The Forest Stewardship Council® (FSC) is a non-profit organization working to promote the environmentally responsible management of the world's forests.

We offer Declare labels

Declare is a completely voluntary program created by the International Living Future Institute to provide purchasers and end users with the knowledge of what is in building and furniture products. It is transparency at its best. The Declare label offers a who, what, where roadmap for materials stating a products origin, ingredients, and end of life. Several of our Meyer Wells solid wood and premium plywood tables with solid wood, premium plywood or steel bases are offered with Declare Labels and are Red List free so you can be confident in your purchase.

We plant a tree for every table we sell

Working with One Tree Planted, we are committed to planting a tree for every table we sell.

Our products are built to last

A better built product not only works better, it lasts longer. From the start, we've placed an importance on extreme durability and masterful craftsmanship, and we've continued to support these ambitions with investments in our machinery and our people. Our factory, and our company, is built around the dedicated individuals working to design, engineer, and build what we refer to as Coriander-quality furniture. Because of this, we can confidently offer a 10-year guarantee on our products and know they will last much longer and stay out of the landfill.

LEED

Leadership in Energy and Environmental Design is a national program developed to form an index for sustainable design. LEED measurements apply to all aspects of a project's interior and exterior. As a part of the LEED-CI, furniture is able to earn several points in regards to low-Emitting Materials, Indoor Chemical and Pollutant Source Control and CFC Reduction.

Coriander Designs is able to follow through on the LEED requirements due to various materials used in the construction. We can acquire and incorporate the use of low formaldehyde composite panel products, as well as agri-fiber panels to satisfy specifications and concern for a cleaner planet.

A vertical photograph on the left side of the page shows a close-up of water flowing over smooth, light-colored rocks. The water is clear and blue, with white foam from the flow. The rocks are grey and white, and the overall scene is bright and natural.

Green Series

Every choice you make contributes to the health of the planet. At Coriander Designs, we are committed to utilizing renewable resources and earth friendly materials to contribute to a sustainable future. Living green can be an individual choice but we like to think of it as our community goal.

Wood

- Solid wood and veneers are Forest Stewardship Council® (FSC) Certified. This label ensures you buying from certified sources that practice responsible forest management.

Cores

- FSC® Certified Cores
- Composed of 100% recycled wood fibers
- Documenting responsible harvesting practices
- Verified by the Scientific Certification Systems (SCS)
- No Added urea-formaldehyde (NAUF)
- LEED Credits
- Sustainable Forestry Initiative (SFI) Certified and Environmentally Preferred Product (EPP) Certified

Varnish

- Self sealing water-white catalyzed conversion varnish
- No hazardous air pollutants
- Low VOC's (Volatile Organic Compounds) and no HAP's (Hazardous Air Pollutants) emitted in the off gas-period
- Formaldehyde Free
- CARB compliant (California Air Resources Board. who is the most stringent production based standards in the world).

Foam

- CFC Free (Chemical Combination that is detrimental to living organisms)
- Recyclable Materials

Fabrics

- Fabrics selected are compose of 100% recycled materials

Drawer Slides

- RoHS compliant (Restriction of Hazardous Substances)
- The "lead free directive" restricts the use of 6 hazardous materials; lead, chromium VI, mercury, cadmium, PBB, PBDE

LEED

- LEED points relating to low-emitting materials, indoor chemical and pollutant source control, CFC reduction and regional supplies
